

IMPORTANT!

BEFORE STARTING THE INSTALLATION OF THE BASICPOWER UNIT™, VERIFY THAT THE LOCATION HAS ADEQUATE GROUNDING ACCORDING TO LOCAL AND NATIONAL CODE.

NOTE: INSTALLATION OF THE BASICPOWER UNIT™ SHOULD BE PERFORMED BY A LICENSED PROFESSIONAL. ALL LOCAL AND NATIONAL ELECTRICAL AND SAFETY CODES ARE TO BE FOLLOWED DURING INSTALLATION.

Wiring Instructions - International (IEC)

1. The wire connecting the Basic Power Unit to the breaker panel shall be insulated and THHN wire.
2. The wire size for each phase shall be according to the unit Cut Sheet.
3. The wire colors for the three phases shall be Black, Brown and Blue and Green-Yellow for ground and Gray for neutral.
4. The wires shall be protected against physical damage between the Basic Power Unit and the breaker panel.
